City: Milwaukee, WI

I am an innovative person seeking a position as a software programmer. I have spent the last 10 years working as a high school Spanish teacher, and inventing new ways to teach urban youth the Spanish language, and I look forward to switching careers and spending many years solving problems in the technical world.

Technical Skills

ASP.NET, Javascript, C#, HTML 5, jQuery, Git, AJAX, Responsive Design, Agile, Microsoft Office, English, Spanish, Smartboard Technologies

Professional Experience

Spanish Teacher - Riverside University High School   August 2007 – November 2016

- Responsible for planning, teaching, and maintaining discipline in classes, collaborating with colleagues to improve lessons, meeting with parents and administration to present and improve student participation and performance

Cycling Instructor - Riverside University High School   October 2007 – May 2015

- Responsible for teaching bicycling safety and riding skills to youth, providing first aid and bicycle maintenance on the road as necessary, reporting any injuries or problems

Spanish Teacher - Franklin High School   June 2016 - August 2016

- Responsible for planning, teaching, and maintaining discipline in summer Spanish classes for middle school age students

Projects

Sound Mind - https://github.com/jenrules/SoundMind

Sound Mind is an ASP.NET application that I designed to help people that live with a mental illness to better manage their recovery. The user has access to soothing music, a paint bucket activity, a medication reminder, a quote of the day, relaxation activities, and the ability to send an emergency text.

Education

devCodeCamp Milwaukee, WI   Graduated: February 2017

Over 600 hours of coding experience focused on HTML 5, C#, Javascript, and ASP.NET

University of Wisconsin – Milwaukee   Graduated: December 2006

Bachelor of Science in Education
